

GXC Upright i.Series® and Horizon Series™ Refrigerators

Professional, Medical-grade Refrigerators | 18, 20, 25, 45 and 56 cu. ft.

GXC COLD STORAGE

A completely redesigned technology platform delivering advanced performance for medical-grade refrigerators serving pharmacy, laboratory, and blood bank applications.

INTEGRATION THAT ELEVATES EFFICIENCY IN HEALTHCARE

The GXC platform is purpose-built for seamless usability. Its fully redesigned system architecture meet's today's critical cyber security standards and lays the foundation for future integration capabilities - all while upholding the high standards of performance and reliability clinicians expect.

PERFORMANCE THAT PROTECTS CRITICAL MEDICAL MATERIALS

Every item stored in a medical-grade refrigerator is tied to a patient counting on timely, effective care. The GXC line delivers superior temperature uniformity, rapid recovery, and long-term stability - helping support critical medical materials remain in optimal condition and ready when patients need them most.

RELIABILITY THAT DELIVERS LONG-TERM PERFORMANCE

A refrigerator should perform flawlessly - so you can stay focused on what matters most. Drawing on millions of datapoints from service calls, rigorous design and engineering testing results, direct customer feedback, and forward-looking industry research, the GXC cold storage platform was designed to support clinical needs for years to come.

INNOVATING FOR CLINICAL LEADERS AND THE PATIENTS THEY SERVE

The Internet of Medical Things (IoMT) now plays a pivotal role in maintaining cold chain visibility and integrity, supporting regulatory compliance, and driving workflow automation as healthcare organizations pursue greater efficiency and higher-quality patient care.

The GXC line of medical-grade refrigerators enhances this effort by building the technological framework for seamless integration with building management systems (BMS), temperature monitoring platforms, environmental sensors, and other connected technologies- helping clinical leaders streamline operations and strengthen patient outcomes.

ESSENTIAL ADVANTAGES

Beyond enhanced communications technology, the GXC line of medical-grade refrigerators introduces a range of hardware improvements designed to elevate usability and support clinical efficiency.

Real-time performance feedback

A robust communication architecture increases data transfer speed and enables real-time feedback capability. This lays the groundwork for future integration with automation systems to help monitor the safety of vaccines, blood products, and reagents.

Security-first technology foundation

Built on industry-standard credentialing, strong encryption and rigorous authentication practices, the platform benefits from ongoing security patching, and continuous penetration testing to identify and address emerging vulnerabilities- supporting end to end operational protection.

Enhanced touchscreen experience

The i.Center® Plus interface (i.Series) delivers a streamlined user experience with intuitive access to real-time and historical temperature data.

Corrosion-resistant hardware

Coated drawer slides provide increased resistance corrosion from harsh cleaning chemicals, helping extend service life. (Std on Pharmacy units)

Expanded warranty coverage

Updated standard warranty terms for i.Series units now include an additional year of extended labor coverage.

Innovative footprint for space-confined environments

An 18 cu ft configuration enhances storage capacity within a narrower footprint, supporting tight clinical spaces without compromising volume.

GXC Models

Current GXC models are listed below.

iPR118-GXC	HPR118-GXC	iBR118-GXC	HBR118-GXC	iLR118-GXC	HLR118-GXC
iPR120-GXC	HPR120-GXC	iBR120-GXC	HBR120-GXC	iLR120-GXC	HLR120-GXC
iPR125-GXC	HPR125-GXC	iBR125-GXC	HBR125-GXC	iLR125-GXC	HLR125-GXC
iPR245-GXC	HPR245-GXC	iBR245-GXC	HBR245-GXC	iLR245-GXC	HLR245-GXC
iPR256-GXC	HPR256-GXC	iBR256-GXC	HBR256-GXC	iLR256-GXC	HLR256-GXC

Let's Collaborate on your Cold Storage Solution.

Learn how our new GXC Models can support your clinical workflows.
