Thermo Scientific Series 8000 – Direct Heat and Water Jacket CO₂ Incubators

Ultimate cell culture protection

Series 8000 CO₂ Incubators – Superior Selection, Stability and Protection

CO₂ incubators are essential for optimum cell culture, and versatility is a must.

Thermo Fisher Scientific is the world leader in serving science. With over $100,000 \text{ CO}_2$ incubators in use worldwide, we have established our global leadership in cell culture incubation technologies

Thermo Scientific – the Name to Trust

With the Thermo Scientific Series 8000 CO₂ incubators, you have the ultimate choice of both water jacket (WJ) and direct heat (DH) technology, giving you the flexibility you can depend on for growing cells.

Built to the highest standards of workmanship and backed by unsurpassed service and technical support, our new Thermo Scientific Series 8000 CO₂ incubators are designed to provide total peace of mind.

Ultimate protection

In every Thermo Scientific Series 8000 incubator, a HEPA filter inside the chamber filters out contaminants. The HEPA filter is located inside the incubator chamber for optimum filtering, easy access, and simple replacement (no tools needed). An adjustable built-in timer notifies you when to replace the filter.

Complete Contamination Control

Contamination prevention is better than cure. With the proven contamination prevention technologies of the Thermo Scientific Series 8000 CO₂ incubators, you can save time and money, while keeping your cultures safe.

Rapid Response Class 100 Cleanroom Air Quality

Product yields and reliability can be affected by airborne contamination.

HEPA Class 100 air quality control reduces particulates to cleanroom levels, minimizing the risk of product loss and downtime. The patented HEPA Filter Airflow System:

- continuously filters chamber volume to provide an aseptic culturing atmosphere
- filters out airborne biological particulates, the primary sources of lab contamination
- ensures Class 100 air quality is achieved within five minutes of door closure

Time Saving Easy Cleaning

Every aspect of Thermo Scientific Series 8000 CO_2 incubators is designed to be easy to clean.

- polished stainless steel interior with 100% coved corners saves cleaning time and reduces contamination risk
- an adjustable timer, signals when the easy-to-access HEPA filter needs replacement
- disposable snap-fit blower/scroll mounting, stainless steel shelves and supports, and HEPA filters can all be removed easily without tools

Clear and precise: the intuitive user interface provides easy to use controls for all settings, as well as feedback on all vital information via the message center and alarm array

<u></u>

Polished stainless steel interior with 100% coved corners is easy to clean, saving time and reducing contamination risk.

Thermo Scientific Series 8000 WJ

Simply More Security

Maximum Thermal Protection

With a triple wall construction and large volume of water, Thermo Scientific Series 8000 WJ, water jacket CO₂ incubators provide unsurpassed temperature stability and protection against heat loss.

The water jacket technology holds the temperature for extended periods of time, which is critical during power failures. Under test conditions, the temperature dropped initially at only 1 °C per hour and just 7.6 °C in 10 hours. Thermo Scientific Series 8000 WJ CO_2 incubators also provide fast temperature recovery. The patented, heated, dual pane glass inner door is more responsive than standard doors and minimizes condensation.

Easy set up

The incubator message center controls are powerful and intuitive. The remote alarm contacts and an optional digital RH display enable continual monitoring for humidity dependent applications.

Water Jacket

System Configuration – Configure audible			Heater On Indicator
on/off, access code, HEPA filter change reminder, remote alarm contacts, tracking low temp and high and low CO_2 alarms.	Alarms		Programming buttons
	Mode Select	Message Center	Temperature Display/ RH Display (optional)
Main Switch – Series 8000 DH on front Series 8000 WJ on side			
		CON HEAT	
		INJ	
Run – Class 100 timing reminder appears after door is closed for five minutes, message			
changes to describe alarm conditions			
			Scroll for Program Parameters
Setpoint – Set temp, overtemp, CO ₂			
Calibration – Calibrate temp, CO ₂ , RH (optional)			
	Gas Inject Indicator		
	CO. Display /O. Display (optional)		

CO2 Display/O2 Display (optional)

Thermo Scientific Series 8000 DH

Culture with Confidence

On-Demand Sterilization

Thermo Scientific Series 8000 DH, direct heat CO_2 incubators include an easy-to-use, safe and proven sterilization system to destroy all forms of microbial life inside the chamber. The automatic high temperature decontamination cycle is ideal for overnight sterilization and ensures consistent sterilization time after time. Audible alarms and access codes ensure laboratory and product safety as well as security.

The Mobile Answer

Thermo Scientific Series 8000 DH CO₂ incubators are light in weight. With the roller base accessory, these advanced incubators can be moved quickly to where needed within your laboratory.

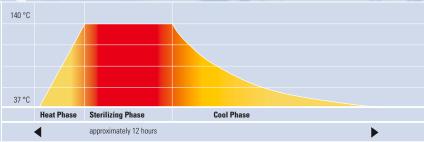

Easy to Configure and Use

Thermo Scientific Series 8000 CO₂ incubators use a microprocessor controlled monitoring system Message Center. The message center is highly intuitive and extremely user friendly. For example, the sterilization cycle is started by the simple press of one button. Options available include a digital RH display, to enable continual monitoring for humidity dependent applications.

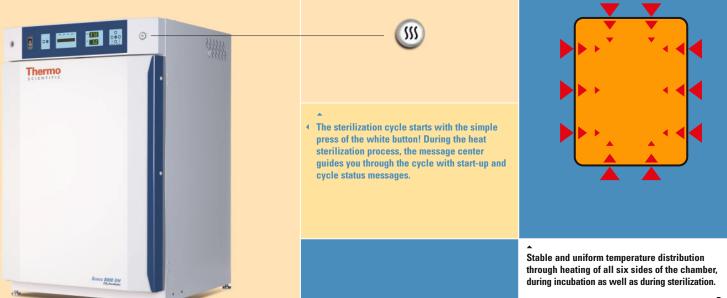

Direct Heat

High Temperature Uniformity

Directed airflow and direct chamber heating maintain optimum uniformity for an ideal culturing environment. During the sterilization cycle, the same system ensures that your incubator's entire chamber is sterilized – all contamination is eliminated.

Direct Heat Sterilization Cycle – 120 minutes at 140°C – ensures the elimination of all microorganisms and fungal spores from every incubator surface (ANSI/AAMI/ISO 11134). This claim has been validated with suspensions from B. subtilis spores calibrated for dry heat processes, because these are most resistant against dry heat sterilization and therefore the recommended indicator organism (U.S. Pharmacopoeia, ch. 1035). All spores applied to the different surfaces of the incubator – chamber wall (stainless steel), door (glass) and door gasket (tempered silicone), have been reliably eliminated with the sterilization cycle after 120 minutes at 140°C.

Accessories

Accessories are customer installed unless indicated otherwise. In addition to providing a standard line of equipment and accessories, we will manufacture custom accessories to meet your specific requirements. Contact us for details.

Fig. 01 | Roller Base

Heavy-duty, dual-castor base with swivellocks and leveling feet, raising unit by 3.0" (7.6 cm). Supports up to two stacked units.

Fig. 02 | HEPA Air-Filter

The High Efficiency Particulate Air-Filter (HEPA) removes more than 99.97% of all particles 0.3 microns and greater in size. Consequently, 'Class 100' air quality (<100 particles per cubic foot of air) is achieved within 5 minutes of door closure.

Fig. 03 | External Automatic Gas Tank Interchange

Monitors CO_2 and automatically switches from one cylinder to the other when the supply is exhausted.

Fig. 04 | Two-Stage CO_2 Gas Regulator

Regulators with barbed connection and shut off valve.

Thermo Scientific Series 8000 WJ CO₂ Incubators

Technical Specifications		
Temperature		
Control	±0.1 °C	
Range	5 °C above ambient to 55 °C (131 F)*	
Uniformity	±0.2 °C @ 37 °C (98.6 F)	
Tracking Alarm	User-programmable high/low	
Temperature Safety		
Sensor	Precision thermistor	
Controller	Independent analog electronic	
Setability	0.1 °C	
CO ₂ /O ₂		
CO ₂ /O ₂ Control	Better than ±0.1 %	
CO ₂ Range	0-20 %	
O ₂ Range	1-20 %	
Inlet Pressure	15 PSIG (1.0 bar)	
CO ₂ Sensor	T/C or IR	
O ₂ Sensor	Fuel cell	
Readability & Setability	0.1 %	
Tracking Alarm	User-programmable high/low	
Humidity		
RH	Ambient to 95 % @ 37 °C (98.6 F)	
Humidity Pan	3.2 qt. (3.0 liters) standard	
Display (opt.)	In 1% increments	
Fittings		
Fill Port	3/8" hose (barbed)	
Drain Port	1/4" hose (barbed)	
Access Port	1.3" (3.3 cm) with removable silicone plug	
with filter		
CO ₂ Inlet	1/4" hose (barbed)	
Unit Heat Load		
115 V/230 V	344 BTUH (100 watt)	

Shelves (Continued)			
Dimensions	18.5" x 18.5" (47.0 cm x 47.0 cm)		
Construction	Stainless steel, perforated		
Surface Area	2.4 sq. ft. (0.2 sq. m)		
Max. per Chamber	40.8 sq. ft. (3.8 sq. m)		
Standard, Maximum	3, 16		
Construction			
Water Jacket Volume	11.7 gal. (43.5 liters)		
Interior Volume	6.5 cu. ft. (184.1 liters)		
Interior	Type 304, mirror finish, stainless steel		
Exterior	18 gauge, cold-rolled steel, powder coated		
Outer Door Gasket	Four-sided, molded, magnetic vinyl		
Inner Door Gasket	Removable, cleanable, feather-edged, silicone		
Electrical			
All	115 V, 50/60 Hz, 3.6 FLA (Operating range 90-125 V)		
	230V, 50/60 Hz, 2.0 FLA (Operating range 180-250V)		
Circuit Breaker/Power Switch	6 Amps/2 Pole		
Convenience	75 watts max. (one per receptacle chamber)		
Plug	115 V: NEMA 5-15P plug; 230 V: CEE 7/7 plug		
Alarm Contacts	Power interruption; deviation of temp,		
	CO ₂ , O ₂ , RH; customer connections		
	through jack on back of unit

3426	IR	yes	115 VAC	3427	IR	yes	230 VAC

Choice of T/C or IR Sensor

Select a T/C sensor when chamber temp and RH are relatively constant. Typically, a T/C sensor has a longer life than an IR sensor.

Select an IR sensor when temp and RH levels are changed frequently. With either sensor, elevated RH is critical to prevent desiccation.
